Forecast for Monday 05 Aug 2024

Weather: Cloud lowering through the early hours to give widespread hill fog. A dull start to the morning with poor visibility over the higher hills. Some drier spells from late morning onwards with the cloud breaking at times to give occasional sunny intervals. Cloud lowering again during the late afternoon with further rain and drizzle, perhaps heavy, arriving from the west. A windier but warmer day than Sunday.

Chance of cloud-free hill tops above 600m: 40% but 60% in northern areas during the afternoon.

Low cloud and visibility: Extensive cloud above 300-500m during the morning, this becoming periods above 700m at times during the afternoon with the best of the breaks in northern areas for a time. More extensive cloud above 400-600m developing by the evening. Poor visibility during the morning and very poor at higher levels. Becoming good for a time at lower levels in particular, but possibly deteriorating again into the evening.

Forecast for Tuesday 06 Aug 2024

Weather: Cloud and rain clear through the early hours of the morning, leaving cloudless peaks during mid-morning. Remains mostly dry during the day with the odd shower, but likely to be light and short lived. Plenty of sunny spells for much of the day but a risk of lower cloud developing around higher hills during the evening.

Maximum wind: West to southwest 25-30 mph.

Chance of cloud-free hill tops above 600m: 30% during the early hours, but 10% during the mid-morning and through the afternoon.

Low cloud and visibility: Low cloud and poor visibly in the early hours of the morning, but lifting quickly to leave excellent visibility. Visibility may drop occasionally in any showers that develop for a short period of time and again during the evening with lower cloud on higher hills.

Temperature: **Valleys:** Plus 15 Celsius rising to plus 21 Celsius
At 600m: Plus 11 Celsius rising to plus 15 Celsius.
Freezing level: Well above the summits.
